Full stack web developer with a passion for making diverse applications. With experience in Ruby on Rails, JavaScript, and React and a background in Research Analysis, I discovered web development through making my own eCommerce site. I bring strong skills in leadership and communication that help industries scale their agendas or ideas to the public through the power of Web Development. Published Tech blogger with 'Noteworthy The Journal Blog' and 'The Startup' in Medium.

TECHNICAL PROJECTS

Memory Game - [GitHub](#) | [Website](#)

This game demonstrates an individual's memory based on the cards that are matched in pairs

- Incorporated HTML5 as a template for the modals and cards to be displayed
- Enabled custom CSS3 to toggle between cards and show different images/ show modals
- Functionalized with JavaScript to give logic and compare the two cards selected
- Equipped with Font Awesome Icons for style purposes
